EMPLOYMENT

OneTrust

Front End Intern

Atlanta, GA

Mar 2016 to Sep 2016

Built new features including SAML single sign-on, and iterated on existing features to expand usability on the client-side of the application with AngularJS, HTML and SASS.

PROJECTS

cypher-finder

Jun 2015 to Nov 2015

Developed a web application in MVC architecture that tracks events on a global google map to allow local, underground dance communities to be more easily discoverable using MongoDB, ExpressJS, AngularJS and Node.JS.

godspeed-adventure

Oct 2015 to Dec 2015

Designed and wrote a 2D GameBoy Advance game in C for Media Device Architecture class, implementing game physics, parallax scrolling and a combat system.
